A day would keep your rooms warm in winter. But that small stove will burn only twenty-five. Hence, discomfort and misery.

A certain amount of fat, burned daily, would keep your body warm and healthy. But your digestion is bad, and you don't get it from ordinary fatfood. Hence you are chilly, you catch cold easily, you have coughs and shivers; while pneumonia, bronchitis, or consumption finds you with no resistive power.

Do this. Burn better fuel. Use SCOTT'S EMULSION of Cod-liver Oil. Appetite and digestive power will revive; and soon a warm coating of good flesh will protect the vital organs against the cold and the body against disease.

A special from Hopkinsville, says : Joe Wall, aged ten, this morning jumped on a bicycle behind another boy. He was barefooted and his big toe caught in the wheel, cutting it nearly off. He pulled it off and walked home, carrying it in his hand. The physician put it back and the boy is doing well.

Predictions For September.

HICKS, the weather prophet, says From 15 to 17th is another period of equinoctial disturbance, calling for vigilance on the part of those whose interests are obnoxious to storms. On land and sea the same is eminently true during the period from the 21st to 24th. 'A sharp change to colder will come after storms. On and about 27th, 28th, many high gales and violent inland storms are propable; high barometer and cold will prevail as September approaches its end. Earthquakes prolable at any time in the month."
